Healing a hurting world

Guide for taking your Episcopal Asset Map Survey

www.episcopolassetmap.org

Institution Name:

Episcopal Asset Map

The Domestic and Foreign Missionary Society and Episcopal Relief & Development have launched a new Asset Mapping platform for the Church. This free web-based platform allows Episcopal institutions to input, share and search information about their own ministry programs and those of other congregations.

The goal is to facilitate and encourage collaborative ministry and network development in The Episcopal Church by providing a platform to share information about our individual mission programs in one searchable, visual database.

The web-based platform looks like other online map applications (i.e., Google Maps) with every plotted pin representing an Episcopal institution: church, school, seminary, diocesan office, etc. Users can click the pins to read more about the institutions' various ministries, search the diocesan map to see where similar outreach is being done or scan the list-view and see contact information to reach out to potential ministry partners.

Please use this document to help guide your congregation or other institution through the survey-taking process. Then anyone from the congregation can input the information into the site directly with assistance from your diocesan map administrator as needed. You can contact the diocesan map administrator for your diocese using the Contact form on the website.
